Fostering Women’s Entrepreneurship in South Asia
Relevance, challenges and possible drivers

Wanphen L. Sreshthaputra, Social Affairs Officer
ESCAP South and South-West Asia Office

Outline

- Introduction: ESCAP and the United Nations system
- The mandate of ESCAP
- ESCAP SSWA Office: Policy priorities for achieving the SDGs in South Asia
- Fostering women’s entrepreneurship in South Asia: Criticality, challenges and possible drivers
- Concluding remarks
ESCAP and the United Nations system

- Regional arm of the United Nations
- Established in 1947
- Intergovernmental forum
- Largest of five United Nations regional commissions

Vision

`A prosperous Asia and the Pacific, based on inclusive and sustainable development`

Mission

`To facilitate concerted action for balanced integration of the economic, social and environmental dimension of sustainable development`
ESCAP and the UN system (Cont’d)

- Undertakes research, study and analysis on critical and emerging issues
- Uses its convening power to provide a unique forum for member States to discuss and adopt policies, particularly common approach to regional challenges
- Provides technical assistance to member States, particularly through knowledge platforms
Our mandate: The Regional Road Map for Asia-Pacific

- Based on extensive dialogue between member states and inputs from civil society organizations and the broader UN community

- The road map was adopted in March 2017 - in the Fourth session of the Asia-Pacific Forum on Sustainable Development

- It is the only inter-governmentally agreed, member-state driven, regional roadmap for implementing the 2030 Agenda in Asia-Pacific
Our mandate: The Regional Road Map
(Cont’d)

OBJECTIVE
In line with the 2030 Agenda, the road map objective is to promote the balanced integration of the three dimensions of sustainable development through regional cooperation.

- It will support LDCs, LLDCs, SIDS, countries in conflict situations and post-conflict countries and other countries with special needs.
- It aims to place gender equality and women’s empowerment as a central issue of the regional policy agenda.
- It recognizes that sustainable development is underpinned by peaceful and inclusive societies, addressing inequality, and by good governance.

EXPECTATION
- Strengthen regional cooperation in priority areas
- Enable continued, efficient and coordinated support
- Facilitate more effective knowledge sharing

PRIORITY AREAS
- Data and statistics
- Technology
- Finance
- Policy Coherence

PRACTICAL MEANS OF IMPLEMENTATION
- North-South, South-South, international and regional partnerships

THEMATIC AREAS OF COOPERATION
- Leave no one behind
- DRR and resilience
- Climate change

MULTISECTORAL IMPACTS
- Natural resource management
- Connectivity
- Energy
Thematic areas of cooperation

LEAVE NO ONE BEHIND

- Promotes advocacy to address inequalities, reduce poverty and enhance social protection;
- **Advances gender equality and women’s empowerment**;
- Addresses unemployment and underemployment among youth;
- Facilitates regional and subregional dialogue on policies to address population ageing;
- Strengthens linkages between international migration and development

Policy priorities for achieving the SDGs in South Asia

- Interrelationships between many goals and targets
- Positive spillovers of integrating economic, social and environmental pillars
- Identify key policy priorities for South Asia that will help maximize those interrelationships and spillovers
MDGs remain an unfinished agenda in South Asia

Seven key policy priorities for achieving the SDGs in South Asia

1. Create jobs through balanced economic transformation and sustainable industrialization
2. Close gaps in infrastructure by providing essential basic services to all
3. Harness the demographic dividend through universal access to education and health
4. Provide universal social protection and financial inclusion to reduce inequalities and dire deprivations
5. Address food security and hunger with sustainable agricultural productivity improvements
6. **Promote gender equality and women’s empowerment through entrepreneurship**
7. Enhance environmental sustainability through low-carbon climate-resilient pathways
Fostering women’s entrepreneurship in South Asia: Relevance/criticality

- Although MDG goal on gender equality in primary and secondary education achieved, subregion lags behind in economic and political empowerment of women
- South Asia also has highest level of female child mortality and violence against women and girls remains prevalent
- Low female workforce participation rate
- Opportunity cost gender inequality very high ranging between $800 billion to $3.3 trillion additional GDP by 2025 in South Asia
- Promoting women’s entrepreneurship through gender-friendly ecosystem and credit facilities for women entrepreneurs as potent catalyst for achieving inclusive and sustainable development.
- Only about 8-9% of formal SMEs owned by women in the subregion

Fostering women’s entrepreneurship in South Asia: Criticality

Fostering women’s entrepreneurship in South Asia: Criticality (Cont’d)

- Entrepreneurship and the 2030 Agenda:
  - The Agenda recognizes the important contribution of entrepreneurship to sustainable development by creating jobs and driving economic growth and innovation, improving social conditions and addressing environmental challenges
    - GA Resolution 69/210 on Entrepreneurship for Development
    - SDGs 4 (Quality education) and 8 (Decent work and economic growth) explicitly address entrepreneurship, as well as targets 9.3 (Increase access of small-scale industrial and other enterprises to financial services)
    - Entrepreneurship as an important strategy to achieve several other goals and targets (ex. Goals 2, 5, 10, even 12, 17)

Major gender specific barrier in women entrepreneurship (UNCTAD, 2011):

1. Access to finance
2. Time poverty
3. Mobility constraints
4. Lack of relevant education/skillls & training
Fostering women’s entrepreneurship in South Asia: Challenges

Key issues and barriers:

- Capacity-related throughout the entrepreneurial journey
  - Sociocultural norms, mobility constraints
  - Gender gaps in labour force participation, unpaid work; time poverty
  - Unequal access to opportunities, networking, skills development training, business knowledge and information, scarcity of role models

- Access to finance and credit
  - Lack of financial independence/financial literacy
  - Unequal access to banking and gender-insensitive banking sector
  - Unequal inheritance rights

Fostering women’s entrepreneurship in South Asia: Challenges (Cont’d)
Fostering women’s entrepreneurship in South Asia: Possible drivers/recommendations

- Towards a gender-sensitive entrepreneurial ecosystem:
  - Comprehensive approach to promote women's entrepreneurship and address related challenges, encouraging subsector clusters for infrastructure facilities and services
  - Build opportunities for engagement between women entrepreneurs and policy officials
  - Balance policy focus to ensure small and informal enterprises are provided equal opportunity for establishment and growth, relative to larger enterprises
  - Promote broad-based gender equality and women's empowerment
  - Strengthen social protection schemes, including health-care and retirement benefits for independent business owners

Fostering women’s entrepreneurship in South Asia: Possible drivers (Cont’d)

- Focus on capacity and skills enhancement for entrepreneurship among women
  - ‘Enhance recognition and understanding of multiplicity simultaneity of women’s work’ (3 Rs)
  - Support multiple mechanisms for domestic support and childcare
  - Enhance awareness, exchange of information and good practices on women's entrepreneurship, with appropriate tools and channels
  - Promote entrepreneurship in educational institutions (from Grade 8) and as part of management courses. Also promote and replicate successful training courses, with post-training follow-up, support, mentoring; emphasis on marketing, product development, finance and cost management, ICT
  - Streamline process for business registration and licensing (one-stop shop) and reduce the cost of doing business.
Fostering women’s entrepreneurship in South Asia: Possible drivers (Cont’d)

- Enhance equitable access to finance and credit
  - Promote financial inclusion and formal banking
  - Promote affordable and stable access to credit for MSMEs, prioritizing their development
  - Engage with financial institutions to develop standards for fair and equal treatment of women credit applicants and promote gender-sensitization training of bank branch managers and establishment of women cells
  - Incentivize risk-taking behaviours among bankers (so they may be more inclined to share the risk burden)
  - Promote and facilitate easy delivery mechanism for credit, aiming for single windows (for integrated information and access support for all loans and schemes)

Conclusion

- Women entrepreneurs, ICT-empowered can be a massive force for change and potent catalyst for accelerating inclusive and sustainable development
- Decision- and policy-makers who are championing the entrepreneurial cause are key to the transformation and to accelerate the pace of change.
- ESCAP stands ready to assist further, to help shift this women entrepreneurs’ movement from the margins to the mainstream and ‘to advance women’s empowerment as an integral part of inclusive and sustainable development’
Conclusion

“For supportive [entrepreneurial] ecosystems, multi-sectoral collaboration is essential with concerted efforts needed by policymakers, financial institutions, the private sector and the women entrepreneurs’ networks.”

Dr. Shamshad Akhtar, United Nations Under Secretary-General and Executive Secretary of ESCAP
December 2017
