ABOUT US

Founded in December 2003, the Internet Service Providers Association (ISPA) of Tajikistan is a non-profit organization that unites 3 commercial Internet service providers and the Association of TARENA, an ISP for the academic community.

The mission of ISPA is to promote a transparent, easy-to-access, competitive and creative Internet market that stimulates the economic and social development of the country.

To achieve this goal, ISPA, in partnership with other Internet stakeholders and civil society organizations, works to achieve the following objectives:

- The institutionalization of Internet content self-regulation.
- The establishment of an independent regulatory authority of telecommunications.
- The improvement of information literacy, in particular, Internet literacy and the information culture of society in general.
- Positioning Tajikistan as a telecommunication hub of the region.
## WHAT WE DO

### Academy-related activities

- ToT on Modules 3, 7, & 8 of the Academy in Tajikistan on Sept. 13-20, 2011 (ISPA as partner).
- National ToT for Primer 1, Modules 9, 10 & 11 in Yavroz, Varzob, Tajikistan (Aug. 20 – 24 2013).

### Activities

<table>
<thead>
<tr>
<th>Primer 1 Master’s Classes for Universities in Tajikistan (August 25 – 27, 2013)</th>
<th>Adoption of new teaching (elective / optional) module ICTD based on Primer in at least two universities.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primer 1, Modules 9 -11 National ToT Yavroz, Varzob, Tajikistan (August 20 – 24, 2013)</td>
<td>Increased ICTD national trainers pool.</td>
</tr>
<tr>
<td>Primer 1 Localization and Presentation in Dushanbe and across the country (March 2012 – February 2013)</td>
<td>Introduction of ICTD as an interdisciplinary training module across many university disciplines.</td>
</tr>
</tbody>
</table>

### Expected Impact

- Integration of Primer 1 in existing teaching modules in universities.
- Integration of interdisciplinary studies in the national academic community.
- Growth of culture of case studies development to explore local experiences.
- Increased ICTD national trainers pool.
- Improved national capacity of trainers for the Academy modules and Primer Series.
- Social media applications as tools for development.
- Better deployment of ICT for disaster risk management.
- Improved status of ICTD as an interdisciplinary training module across many university disciplines.
- Case studies development as a main approach to share and explore local ICTD and other development projects.
- Reinventing creative potential of the digital youth equipped with ICTs.
- Strengthened local capacity on localization of Academy modules and Primer series.
