wiFi is a flagship programme that has an overall mission to create socially and economically-empowered women through ICT-enabled entrepreneurship. It endeavors to accomplish this through two key objectives: 1) Strengthen the capacity of current and potential women entrepreneurs in Asia and Pacific on utilizing information and communication technologies (ICT); and 2) Strengthen capacity of government leaders and policymakers to create an enabling environment for ICT-empowered women entrepreneurs. Launched in June 2016, 5 modules are available with additional resources.
